**BACHELOR OF
INDUSTRIAL
LOGISTIC
(HONS)**

OVERVIEW

Logistics management is one of the foundation blocks of any successful business. With the onslaught of globalization, logistics management has become more complex and face stiff challenges. It entails a wide variety of activities as global enterprises need to integrate the flow of goods from the suppliers, through their facilities, on to their customers. Proper performance of logistics functions can thus contribute to both lower costs and enhanced customer service. Unless an organization can manage and coordinate the movement of materials, information and cash through its business, and those of partner organizations, it is unlikely to outperform its competitors. With Malaysia's strategic development in the logistics sector, such as, business expansion in air cargo hub, container port, as well as in service industries like airlines, couriers and banks, the market demand for logistics professionals is tremendous. Typical challenges in this area will include supply chain design (materials handling, facility location, plant layout, integrated production systems, warehousing, pricing, service support), supply chain operations (inventory control, third-party logistics, transportation and freight operations, air cargo systems, routing, network optimization, distribution channels) and tactical issues (item tracking). Universiti Kuala Lumpur has risen to this challenges by offering programmes that prepare graduates with knowledge of the strategic and economic principles of the efficient flow of materials, information, capital and products through the whole distribution network.

FLEXIBLE LEARNING

Offering flexibility to cater to your schedule, so that you can pursue additional knowledge without interfering with your work schedule.

UniKL offers the flexibility to cater to your work schedule and provide you with the opportunity to enhance your skills whilst not compromising your work time. This workaround learning schedule is the main reason many professionals choose to enter UniKL's FlexiLearn programmes. Selected Professional Certificates can be embedded into the programmes as well. Furthermore, prior academic qualifications and working experience may be taken into consideration for syllabus exemptions.

APEL

Accreditation of Prior Experiential Learning

APEL (Accreditation of Prior Experiential Learning) is a systematic process which involves the IDENTIFICATION, DOCUMENTATION, and ASSESSMENT of prior experience related to a study programme.

APEL is a systematic process that involves the identification, documentation and assessment of prior experiential learning, i.e. knowledge, skills and attitudes, to determine the extent to which an individual has achieved the desired learning outcomes, for access to a programme of study and/or award of credits.
