UNIVERSITI KUALA LUMPUR

ASSALAMUALAIKUM

AND GREETINGS OF WE ARE UniKL

It is with great pleasure that I present to you the First Edition of UniKL's Directory of Expertise which brings together the talents and interests of academic staff from across Universiti Kuala Lumpur. At UniKL, it is our mission to provide the highest quality education in state-of-the-art engineering technology principles and practices at undergraduate and postgraduate levels.

UniKL is relatively a very young University, formed in 2002 from the amalgamation of 7 MARA institutes. Today, we boasts a total of 12 campuses strategically located around peninsular Malaysia offering 130 programmes in 14 Specialisations courses. The level of studies include Professional Courses, Diploma, and Bachelor Degree to Master's Degree and PhD programmes. To date, we have produced almost 32,000 graduates plying their trade in Malaysia and around the globe within their respective capacities.

UniKL is taking on a very interesting journey for the next five years. We aim to position ourselves as one of the top universities in Asia by 2020, spearheading the Higher Technical and Vocational Education and Training (HTVET). To accomplish this, it is imperative UniKL possesses the best minds and technical experts to lead the academic culture and bring forward a paradigm shift in our academic approach to produce quality graduates who are highly sought after by the industry.

UniKL emphasises practical hands-on training approach for our students and as such, our teaching workforce are required to have industry training and experiences. The expertise we have at UniKL brings years of industry experience who is then able to translate that experience to valuable knowledge to the students.

Many of our experts are also happy to explore opportunities to undertake consultancy and research work with external organisations. We look forward to greater collaboration with all parties and contribute to the growth of the nation.
